

You are not required to purchase this kit for the completion of your course. You may find them useful for self-directed skills development. Please note that many health services either do not allow or discourage the use of, personal equipment pouches or kits by nurses giving direct patient care. This is due to the potential for this equipment to be an infection control risk. This means that you may not be permitted to use this kit while undertaking off campus clinical practice in a health care facility.
